

Established in 1987 ACC (Advance Computer Centre Ltd) is a IT services company based in London supplying businesses across the UK. We offer a full range of services in the following areas:

IT HELPDESK

SOFTWARE LICENSING

HARDWARE SALES, INSTALLATION & MAINTENANCE

CLOUD BACKUP

HOSTED EXCHANGE

AUTOMATED NETWORK MONITORING

/ e believe that business processes are rich with opportunities for our clients not only to save money but to grow, grab market share and drive customer loyalty. We partner with our clients to give IT a strategic value within your company. This deep collaboration is the basis of what we call next-generation information technology support outsourcing (ITSO).

Our Approach:

We are able to be a single point of contact for our clients managing different technologies and vendor relationships. By doing this we can save our clients both time and money which can be reinvested into their business. Our services have been designed to work well both by themselves and in conjunction with one another.

Open Possibilities:

Our partnerships with most major IT manufacturers lets us give our clients competitive prices on all of their IT purchases year round whilst having an up-to-date knowledge base we can help our clients get the most out of their purchases.

Our IT innovation, advanced analytical capabilities, human talent and technology gives us practical business expertise with which we help our clients maintain a stable IT environment with a clear support and problem resolution system with ongoing network monitoring.

Through continuous investment in our people and process and a clear understanding of our customers' needs ACC has been able to enjoy organic year on year growth since inception in 1987. It has been our continued commitment to service improvement that has allowed us to be successful in a competitive and ever changing industry.

Our services work as follows:

IT Helpdesk

Desktop, server & network support for your business, we create an inventory of your IT systems and staff and integrate into our system. Support is delivered either remotely or onsite. This service enables your business to have its own IT department for one predictable monthly cost which is significantly lower than hiring in house support staff.

Hardware Sales, Installation & Maintenance

We have long standing partnerships with most major IT manufacturers, our staff are certified and can offer design, supply, installation and maintenance services for your hardware purchases.

Security & Antivirus

We have partnerships in place with several major IT security companies, are staff are certified and we give design and deployment services for IT security (endpoint, network, server).

Software Licensing

Management of your businesses software licenses, renewals and upgrades. This service ensures that you have exactly what your business requires and are not over paying for anything or purchasing licenses which are not being used.

Hosted Exchange

Microsoft Exchange mailboxes stored in UK datacentres with up to 125GB of mailbox storage space.

Cloud Backup

UK based cloud backup in ISO certified datacentre, if data is lost we can restore it up to ten times faster than traditional in house backups.

Automated Network Monitoring

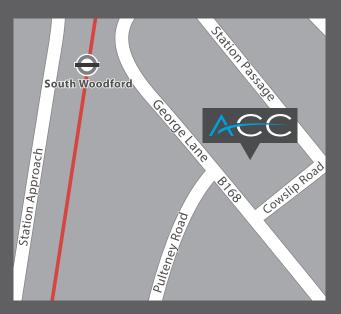

Remote monitoring tool is linked to our helpdesk and scans your system continuously, if any problems are discovered an engineer will be alerted and the problem will resolved.

Why choose us

We have been in the IT industry for over 27 years and have built up a large knowledge base over this time which has allowed us to refine and streamline our services enabling our clients to benefit over the long term from our product offerings. Our continuous support keeps problem

detection and resolutions times to a minimum and with a centralized location and access to good logistics we can get to you fast whether that be for product deliveries or for onsite support, we will be there.
